EXAMINER'S COMMENT/AMENDMENT/REASONS FOR ALLOWANCE

1. All previous rejections have been overcome by the amendment filed January 31, 2005 and the rejections are withdrawn. ***Claims 5-7, 13-44, 53-73*** are now pending in the application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Steven Nichols on March 23, 2005 and authorization to cancel the withdrawn claims was given by Mr. Bradley Hammond on March 4, 2005.

The application has been amended as follows:

Claims 13-44 are cancelled.

In ***claim 5***, line 2 after citric acid, add "and an inorganic acid including a phosphate ion;"

In ***claim 5***, line 3, replace "polyacid;" by "polymer containing acid groups;"

In ***claim 6***, line 2, replace "polyacid;" by "polymer containing acid groups;"

Art Unit: 1713

In *claim 7*, line 2, replace “an organic acid and/or inorganic acid including a phosphate ion;” by “an organic acid including citric acid and an inorganic acid including a phosphate ion;”

In *claim 7*, line 3, replace “polyacid;” by “polymer containing acid groups;”

In *claim 58*, line 2, replace “polyacid” by “polymer containing acid groups”

In *claim 65*, line 2, replace “polyacid” by “polymer containing acid groups”

In *claim 71*, replace “claim 50” with “claim 70”.

In *claim 72*, line 1, replace “polyacid” by “polymer containing acid groups”

Reasons For Allowance

3. *Claims 5-7, 53-73* are allowed.

The following is an Examiner's Statement of Reasons for Allowance:

The instant claims are allowable over prior art to Chen et al. (US 6,274,661 B1) and Taylor et al. (US 6,734,237 B1).

The present claims are directed to a binder composition comprising an acid that comprises citric acid and a phosphate ion, a polyacid and an aqueous solvent (claim 5), a binder composition comprising an organic acid, a polyacid and an aqueous solvent wherein said organic acid is phytic acid (claim 6) and a binder composition comprising an acid including citric acid and a phosphate ion, a polyacid, an aqueous solvent and a colorant wherein said colorant comprises a pigment suspended as particles in said composition and a dye dissolved in said composition (claim 7).

The prior art to Chen et al. discloses fiber glass binders based on polycarboxy polymer. The polycarboxy polymers may further include, as catalyst, an alkali metal salt of a phosphorous-containing organic acid, particularly alkali metal salts of phosphoric acid, polyphosphoric acid and hypophosphorous acid. The binder compositions comprise alcohols such as glycerol, ethylene glycol, propane diol etc. Water may be present up to about 95% by weight of the binder. The binders may further include additives such as dyes, fillers and other conventional adjuvants and has a pH in the range of 2.5-5.

Taylor et al. disclose fiberglass binder composition comprising a polycarboxy polymer, polyol and an imidazoline. The binder also comprises a catalyst which is an alkali metal salt of a phosphorous-containing organic acid. Polycarboxy polymers comprise homopolymers and copolymers of polyacrylic acid. The pH of the binder resin may be at most 4.5. The aqueous binder resin may further include emulsifiers, colorants etc.

However, neither prior art specifically teaches or suggests binder compositions comprising polymer containing acid groups, water and phytic acid or binder compositions comprising polymer containing acid groups, water and a combination of an organic acid comprising citric acid and an inorganic acid including a phosphate ion. Therefore, the instantly claimed invention is deemed allowable over closest prior art of record as per said art neither anticipating nor rendering, alone or in combination, the instantly claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.
